International Conference
2019 May 3rd and 4th in Frankfurt

integrated Mediation
the way of understanding

Mediation is ready for take off. What's about You?

International Mediation Congress

What's about the development and use of mediation? Is it going well or not? This question is frequently asked after some researches and the evaluation of the mediation act in Germany. We will present surprising answers and proposals regarding the implementation of mediation.

The so called Mediation Report 2019¹ summarizes the results of all known evaluations and researches on mediation. It's an overview where some crucial parameters have been added to correctly assess the development of mediation. The result: Only the holistic view allows sustainable forecasts!

Integration means establishing the whole. This view traditionally is the view of Integrated Mediation. What if mediation is the whole and all decision-making processes are just a part of it? A BREXIT would not have happened then and other problems would not arise in the first place. Would not that be an approach that could improve not just society but also the implementation of mediation?

The motto of the conference already gives a foretaste of its content. It is about recognizing the achievements and hidden options of further development of mediation. When the situation is assessed correctly, the right decisions are made. To anticipate the idea:

Yes, mediation is ready for take off. It also would develop well if only ... The Congress deals with concrete proposals to promote mediation the best way.
